Diagram information
This flowchart illustrates the process of ordering a sandwich, including taking orders, modifying the cart, processing payments, and preparing the order. Key components include actions like taking orders, adding items to the cart, reviewing and modifying the cart, processing payment, and preparing the order for pickup or delivery.

- Sandwich Order Processing SOP
- Initiate the order process at the 'Start Order' point.
 - Add items to the cart by choosing 'Add Sandwich', 'Add Chips', or 'Add Drink'.
 - Include additional options as required to customize the order.
 - Review the current cart contents.
 - Extend the review process by modifying or removing items if needed.
 - Finalize the order by placing it.
 - Begin payment processing upon order placement.
 - Ensure that the payment is successfully received.
 - Generate a receipt for the customer.
 - Prepare the order for customer delivery or pickup.
 - Confirm the order is ready for completion.
